

Re: FCC label location of WF360 POS PDA

Users of WF360 POS PDA could be able to locate the FCC label in two locations.

First, FCC label is placed in the battery compartment of the unit. Since we ship the product with battery unplugged in the standard package, users will be able to see the FCC label every time battery cover is open and battery is inserted to the unit.

Second, WF360 Quick Start Guide comes with standard package. Users will be able to locate the FCC info in the Guide.

As for time of purchase when users send us orders (purchase order), Widefly will send back quotation / proforma invoice which FCC info is included in the official documents.

A handwritten signature in black ink that reads "James Wong".
